

# WER'10: 13<sup>th</sup> Workshop on Requirements Engineering

April 12-13, 2010 – Cuenca, Ecuador

<http://grise.upm.es/wer10/>

## Call for Tutorials

WER'10 is the thirteenth edition of the Workshop on Requirements Engineering series. The workshop started as a meeting of the Ibero-American requirements engineering community, and by now it attracts researchers from all continents. In 2010 WER will be held in Cuenca, Ecuador. In this edition, WER will provide participants with the opportunity to gain new insights, knowledge, and skills in different relevant topics of Requirements Engineering by means of a tutorial program.

### SUBMISSION INFORMATION

WER'10 invites proposals for two hours tutorials to be held in conjunction with the conference. Tutorials should be held in English. We encourage tutorials that reflect the conference spirit and provide clear utility to practitioners.

Topics of interest include, but are not restricted to:

- Requirements elicitation, analysis, and documentation
- Requirements validation, and visualization
- Requirements specification languages, methods, processes, and tools
- Requirements management, traceability, and allocation
- Requirements prioritization, and negotiation
- Modeling of requirements, goals, and domains
- Viewpoints in requirements
- Non-functional requirements
- Requirements engineering and software architecture
- Aspect-oriented requirements engineering
- Requirements for COTS-based systems
- Requirements for Web-based systems and mobile websites
- Requirements engineering for self adaptive systems
- Requirements for the agent-oriented paradigm
- Requirements for product lines
- Requirements engineering case studies and experiences
- Social, cultural, and cognitive factors in requirements engineering
- Aligning requirements to business goals and processes
- Requirements engineering education and training

The program committee will review each proposal and will select quality proposals. Factors to be considered include: relevance, audience appeal, suitability for presentation in a two hours tutorial format, and past experience and qualifications of the instructors.

The tutorial proposal must contain at maximum 4 pages (PDF file) and should cover the following points:

1. Goal and Objectives: The overall goal of the tutorial and the concrete objectives to be achieved.

2. Structure of Contents: Here you should provide a structured overview of your planned tutorial, organized into numbered sections. For each section, you should sketch its contents in a few sentences or bullets.
3. References: Provide references to papers, books, etc. where your tutorial builds on.
4. Sample Slides: Prepare two/three sample slides from the presentation that you would give if your tutorial were accepted. They must be included as part of the proposal.

After acceptance, Tutorial Notes should be sent to be published by the organization in a book with ISBN number. Additionally, they will be indexed by DBLP and made available in WER series repository <http://wer.inf.puc-rio.br/WERpapers/>.

Tutorial Notes should be written in English and must not exceed 6 pages including figures, author's information, abstract, and bibliography. They should be submitted using the 8.5" x 11", two-column IEEE CS Press Proceedings format as a PDF file, available at:

<ftp://pubftp.computer.org/press/outgoing/proceedings/instruct8.5x11.doc>

Tutorial proposals should be submitted to both the co-chairs, [Graciela Hadad](#) and [Oscar Dieste](#).
